

- ✓ The main areas of environmental activity are: the introduction of innovative technologies that protect air and water resources, neutralize industrial waste, reduce emissions of gases and noise, man-made effects on the human body, and improve environmental management systems and ensure environmental monitoring.
- ✓ We offer a review of articles from scientific-theoretical and technical-economic journals devoted to the solution of environmental issues in railway transport.
- ✓ Articles printed in magazines published 2008-2013. Journals are stored in the reading room of the scientific and technical library of the Rostov State University of Communications.
